REFERENCE GUIDE RG21

CATALOGUE PRICING

The prices in this catalogue are for REFERENCE AND BUDGET PURPOSES ONLY, and should be used exclusively as a guideline.

At the time of production of this catalogue (February 2021) prices for raw materials, along with domestic and international freight have increased substantially. As a result we reserve the right to revise prices based on changing manufacturer and market conditions without notice or obligation. Please contact us to confirm your net pricing.

Freight charges and applicable taxes (GST, PST & HST) are extra. All images are used for illustrative purposes only, products may vary.

- Flat back side reduces contact with the user's legs to prevent spillage, stores easily using the coordinating wall bracket, and allows Vikan® scoops to be hung on the bucket rim
- Accessible hand grip is raised from the base on the back side of the pail for an easy grip
- No-drip spout is designed for easy pouring and to prevent liquid from running down the pail
- Grips along the top of the bucket allow for a lid to snap in place (sold separately)
- Drainage hole on the back allows water to escape when the bucket is hung upside down
- Colour-coded to support food safety material handling, cleaning, and sanitation programs
- Accepted for use in Canadian food processing facilities

PAINT BRUSHES

China bristle: Carefully selected for proper stiffness and taper, Chinese hog bristle are best suited for spreading oil-based paints, enamels, stains, shellacs and epoxy coatings.

Nylon/Polyester: Multi-polyester and nylon filament tips provide extra wear and will give excellent service with all paints. All filaments are flagged and tipped for excellent paint pick-up and smooth application.

Polyester: A durable synthetic filament that smoothly spreads latex and oil-based paints equally well. Retains stiffness and flexibility in extreme hot weather conditions and gives fine service, easy to clean out.

Animal Soft Hair: Fine animal hair brushes are essential for laying on exceptionally smooth lacquer, shellac, varnish and enamel finishes.

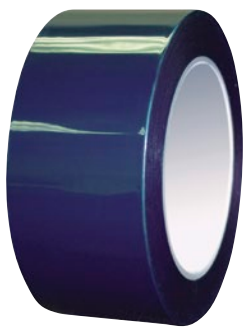
- Electric,120 V - 350 W
- Temperature 260°-450°F

Model No. PC757
Price/Each $776.13

JET MELT™ GLUE STICKS

- Ideal for corrugated, beadboard, packaging etc.
- Low odour
- 8" long x 5/8" diameter
- Colour: Light amber



Model No. AB412
Price per 11-lb Case $268.80

6120 HIGH TEMPERATURE MASKING TAPE

- Polyester (PET) film backing with a silicone adhesive
- Performs well in masking surfaces for complex operations such as powder coatings
- PET backing provides flexibility/conformability, solvent resistance, and chemical resistance
- Removes without leaving residue on surfaces
- Precision cut for tear resistance and clean, crisp paint lines
- 48 mm x 66 m (2" x 216') per roll

Model No. PF207
Price/Each $73.30

VINYL DUCT TAPE 3903

- General purpose vinyl duct tape
- Ideal for sealing and protecting surfacesand openings from dust, dirt and moisture
- Good for colour coding, general maintenance as well as wrapping and bundling
- Leaves less adhesive residue on surfaces than the traditional cloth duct tapes
- Easy to tear by hand
- 50 mm x 45.5 m (2" x 149.25')
- Thickness: 6.3 mils

PREMIUM BOPP FILM HVAC TAPE

- Acrylic based pressure-sensitive adhesive combined with the conformability/ flexibility of biaxially oriented polypropylene (BOPP) film
- Provides superior sealing, protective benefits, and ease of handling
- Printed for easy identification/inspection and resistant to mold growth and high humidity
- Designed and engineered for use on Class 1 flexible duct for permanent seaming and sealing to enhance appearance and provide barrier protection
- All temperature rates, flame retardant, high shear, aggressive, and UV resistant
- Superior bonding at sub-zero or at elevated temperatures
- UV/temperature resistant acrylic adhesive combined with inorganic polypropylene film provides the longest lasting closure method
- Ideal for HVAC applications
- Intended for use on UL listed flexible duct (or other) meeting UL-181 standards

(1) Cyanoacrylates have very good moisture resitance on plastics
(2) Uncured liquid adhesives may cause stress cracking of certain thermoplastics, e.g., polycarbonate, acrylic and polysulfone.
(3) Elevated temperatures are required to dispense liquid Hot Melt Adhesives.
(4) Urethane Hot Melts require 24 hours for full cure.

PLEASE NOTE: This chart should not be used to specify products without specific testing.
It is recommended that you conduct on-part testing to ensure product performance before specifying any adhesive.

INSTANT ADHESIVES (CYANOACRYLATES)

- Widest selection of high-performance, application-specific, instant adhesives
- Available in a variety of viscosities, cure speeds, gap-filling capabilities and substrate compatibilities
- Ultra-high performance Loctite Prism® family offers toughened formulations, low odor, low blooming and thermally resistant formulations

431™ SURFACE INSENSITIVE INSTANT ADHESIVE

- Medium viscosity, clear, gap filling, surface insensitive, one part, room temperature cure instant adhesive
- Designed for the assembly of difficult-to-bond materials which require uniform stress distribution
- Particularly suited for bonding a wide range of materials, including metals, plastics, and elastomers
- Typical use: Gap filling
- Gap fill: 0.008"
- Viscosity: 1 000 cP
- Shear strength: 2300 PSI
- Temperature Range: -65ºF to 180ºF (-54ºC - 82ºC)
- Cure speed: Fixture – 15 sec., full: 24 hrs.
- Colour: Clear

435™ CLEAR SURFACE INSENSITIVE INSTANT ADHESIVE

LOCTITE

- The first true clear, surface insensitive, elastomer-modified instant adhesive
- Low viscosity, clear, rubber toughened, one part, room temperature cure instant adhesive
- Designed for bonding metal, rubber and plastics
- Excellent peel, impact and sheer strength on metals, plastics and rubbers
- Typical use: General purpose
- Gap fill: 0.006"
- Viscosity: 22 cP
- Shear strength: 2700 PSI
- Temperature range: -65ºF to 240ºF (-54ºC to 115ºC)

FUNCTIONAL INTERLOCKING TILES FOR INDUSTRIAL & COMMERCIAL AREAS

Innovation made simple: The most versatile, functional and comfortable 12" x 12" modular tile ever created.

- Best interlocking system – angular LockSafe® interlocking system provides a stronger connection, yet the tiles easily "zip" apart for re-positioning
- Exceptional comfort – ergonomic design and PVC formula dramatically reduce fatigue and lead to increased productivity
- Easy ramp system – one ramp fits both "male" and "female" edges
- No-fuss installation – just snap the tiles together and configure to fit your exact work spaces
- Outstanding value for your cost reduction initiatives – save on replacement costs, installation time, and employee lost time
- Thickness: 5/8"
- Green rating: > 40% post consumer PVC
- Unlike other modular ergonomic flooring systems, large installations of F.I.T.™ can be rolled-up for quick cleaning, repositioning or storage
- It's amazing LockSafe® interlocking system works like flexible hinges to hold tiles together even when large connected sections are tightly rolled
- F.I.T.™ is designed for onsite customization - the tiles can be cut every 3" and still connect
- Just cut the tiles and reconnect for a seamless installation
- This unique feature makes F.I.T. ™ the most versatile interlocking tile on the market and facilitates total coverage of areas with multiple work centres and equipment with unusual shapes

SOLID – for use in dry areas

OPEN – for use in wet areas - surface slants toward holes to facilitate drainage

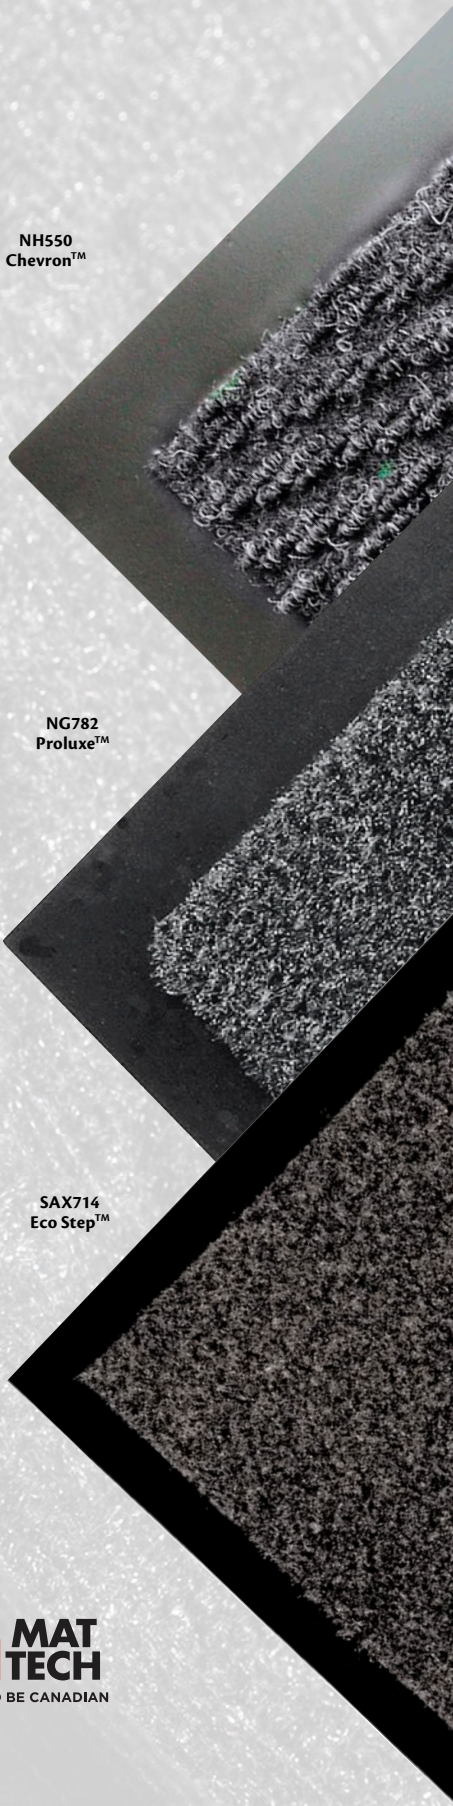
CHOOSING THE RIGHT MAT

There are three types of matting to consider. To select the right type for you, we recommend following these steps:

1. Identify the type of area where you wish to install the carpet, taking into account the amount of traffic it will experience. (ex: heavy traffic vs. light traffic)
2. Refer to the collection of products in the following pages and locate the right fit for you. We've categorized each mat to correspond to one of the four traffic categories, colour coded for your convenience
3. Choose a scraper, a wiper/scraper and a wiper mat. Note: for best results, use three types of mats in the following combination (ex: Upfront Scraper, Super Soaker and Proluxe)

1-SCRAPER

- Exterior usage or between two doors
- Aggressive scraper surface, which will capture the majority of dirt from the soles of shoes
- Does not absorb moisture, which facilitates maintenance



2-WIPER/SCRAPER

- Interior usage or between two doors
- Irregular surface which enables trapping moderate dirt that was not captured at the scraper level
- Moderately retains water and moisture that may later evaporate or be extracted at a later time

3-WIPER

- Interior usage
- Plays a major role in the retention of water and fine dust
- Minimizes the risk of slipping and falling

DID YOU KNOW?

The proper use of entrance mats is recognized by the Green Building Council of Canada, under LEED® certification system (Leadership in Energy and Environmental Design), visioning a transformed built environment leading to a sustainable future.
Some Mat Tech products can contribute to obtaining 2 credits:

1 Credit*: "Permanently use the entrance matting system to capture dirt, particles etc. from entering the building at all high volume entrances"

1 Credit**: Use material with recycled content in order that the sum [...] constitutes at least 7.5% of the total value of the material in the project.

HOWARD LEIGHT

FIT.

Fitting ear canals of all shapes and sizes doesn't have to be difficult.

The right earplug should feel comfortable in the ear canal without compromising protection. Howard Leight earplugs offer a combination of advanced design and material science that ensures the proper fit for every employee.

SELECTION.

Why so many earplugs?

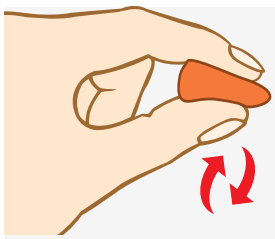
Because people, their ears and their environments are all so different. Howard Leight® offers the widest range of styles to accommodate almost any situation.

PROTECTION.

Hearing protection only works when people use it.

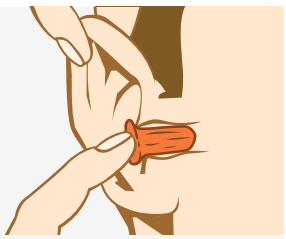
Howard Leight® earplugs provide a range of Noise Reduction Ratings that target hearing protection without compromising overall employee safety.

Earplugs Fitting Instructions



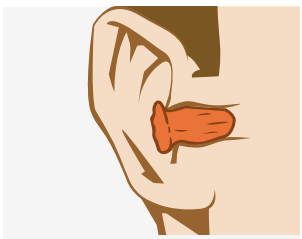
Keys to Successful Hearing Protection with Earplugs

Honeywell
HOWARD LEIGHT



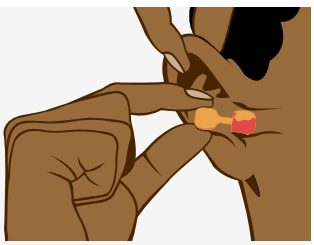
Disposable

Roll-Down Foam — MAX®

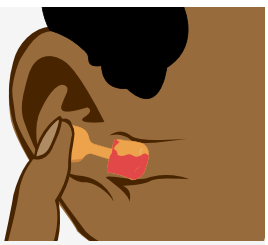


With clean hands, roll the entire earplug into narrowest possible crease-free cylinder.

Reach over your head with a free hand, pull your ear up and back, and insert the earplug well inside your ear canal.

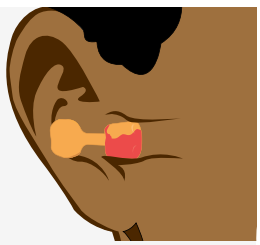


Hold for 30 – 40 seconds, until the earplug fully expands in your ear canal. If properly fitted, the end of the earplugs should not be visible to someone looking at you from the front.



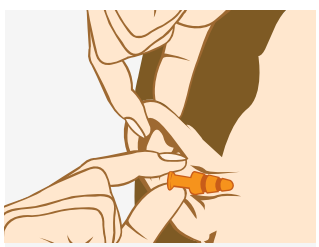
Reusable

Push-In Foam — Trust Fit™

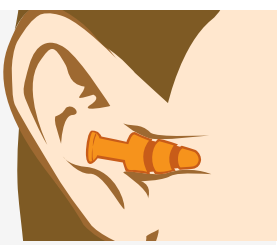


While holding the stem, reach a hand over your head and gently pull the top of your ear up and back.

Insert earplug so foam tip is well inside the ear canal. Use a gentle rocking motion while pushing earplug into ear canal to ensure a deep fit.

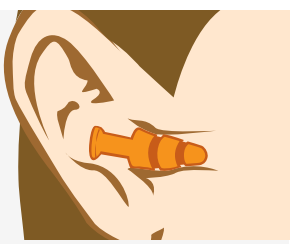


If properly fitted, the tip of the earplug stem may be visible to someone looking at you from the front.

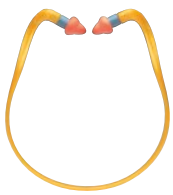


Reusable

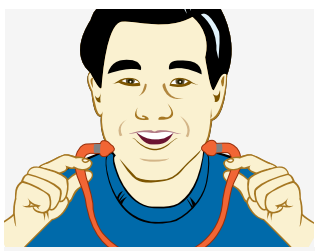
Pre-Molded Push-In — SmartFit®



While holding the stem, reach a hand over your head and gently pull top of your ear up and back.



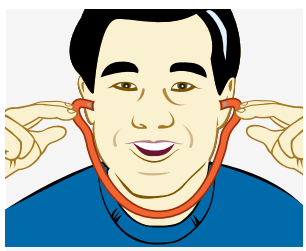
Insert the earplug so all flanges are well inside your ear canal.



If properly fitted, the tip of the earplug stem may be visible to someone looking at you from the front.

Banded

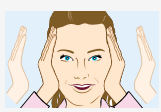
Tension Fit — QB2®HYG



Position band under your chin as shown above. Use your hands to press the ear pods well into the ear canal using an inward motion.

Protection levels are improved by pulling your ear up and back when fitting as shown.

In a noisy environment, lightly press the band inward with your fingertips as shown. You should not notice a significant difference in noise level.



DOs and DON'Ts of Howard Leight Earplugs

Proper Fit
If either or both earplugs do not seem to be fitted properly, remove the earplug and reinsert.

Removal
Gently twist earplug while slowly pulling in an outward motion for removal.

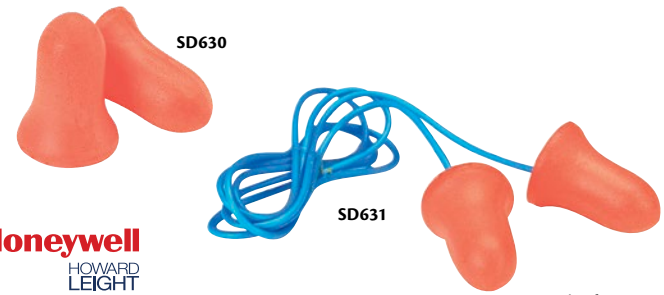
Acoustical Check
In a noisy environment, with earplugs inserted, cup your hands over your ears and release. Earplugs should block enough noise so that covering your ears with your hands does not result in a significant noise difference.

WEAR

- Read and follow all earplug fitting instructions.

SELECTION

- Avoid overprotection in minimal noise environments – in selecting the best earplug for your situation, consider noise levels and your need to communicate with co-workers or hear warning signals on the job.



MAINTENANCE

- Prior to fitting, inspect earplugs or ear tips for dirt, damage, or hardness. Discard & replace immediately if compromised.
- For proper hygiene discard disposable earplugs after use.
- With proper maintenance reusable earplugs should be replaced every 2-4 weeks. Push In Foam earplugs should be replaced every 5 days.
- Wash with mild soap/water, pat dry or air dry, and store in a case when not in use.
- Clean regularly and replace ear tip pods every 2-4 weeks on banded earplugs.

HOWARD LEIGHT

Earmuff Fitting Instructions

Keys to Successful Hearing Protection with Earmuffs

Wear
- Read and follow all earmuff fitting instructions
- Remove all hair underneath ear cushions

Selection
- Avoid overprotection in minimal noise environments – in selecting the best earmuff for your situation, consider noise levels and your need to communicate with co-workers or hear warning signals on the job

Maintenance
- Regularly inspect earcups and ear cushions for cracks and leaks – discard if earcups are visibly damaged or compromised
- Clean earcups and ear cushions regularly with mild soap and water
- Replace ear cushions and foam inserts every 6-8 months under normal wear, every 3-4 months with heavy use or in humid/extreme climates

Headband

Thunder® T3

1 Place earcups over each ear.

2 Adjust the headband by sliding the headband up or down.

Folding

Leightning® L0F

1 Fold out the earcups as shown.

2 Place earcups over each ear.

3 Adjust the headband by sliding the headband up or down.

Multiple-Position

Viking™ V3

1 Place the earcups over each ear.

2 Adjust the headband by sliding the headband up and down.

Multiple-Position earmuffs can be worn either over-the-head, behind-the-head or under-the-chin.

3 When the earmuff is worn with the headband behind-the-head or under-the-chin, the headband strap must be attached to the slot in the upper part of the earcup as shown.

Cap-Mounted

Thunder® T2H

1 Attach adapters to each side of the hard hat by sliding them into the slots.

2 Attach each earmuff into its adapter by sliding the earmuff housing down into the adapter.

3 Place the hard hat on the head and adjust the earmuffs by sliding the cups up and down.

4 Ensure that the earmuff is firmly attached by lifting the arm up and down.

Neckband

Leightning® L1N

1 Adjust the length of the headband strap between the earcups so the earmuff fits well on top of the head.

2 Place earcups over each ear.

Do's and Don'ts of Howard Leight® Earmuffs

Firm Seal
Do seal the cushions firmly against the head.

Avoid Obstructions
Do not allow hair to obstruct the ear or the earmuff's secure fit in any way.

Cover Ear Completely
The earcups should never fit crooked or askew over the ear.

VERSAFLO™ TR-300 POWERED AIR PURIFYING RESPIRATORS (PAPR)

- Significantly smaller and lighter than existing 3M™ belt-mounted PAPR's
- Weight is kept close to the users back, reducing the leverage effect that can cause PAPRs to feel heavier
- Slim profile is designed for use in tight spaces
- Simple, 1-button operation
- Two types of alarms – one audible and one LED – alert the user to either a low battery or low airflow
- Battery and filter can be changed quickly and easily by hand
- Smooth surfaces are less prone to snagging on objects, and facilitate fast wipe downs for easy cleaning
- Air inlet design helps make sitting possible without compromising air intake
- Window on the filter cover allows easy identification of the type of filter installed
- Lightweight lithium ion battery charges quickly and has no memory effect or heavy metals
- LED lights on the battery indicate its charge status both on and of the charger
- Two selectable flow options offer users greater comfort

COMPACT AIR SERIES 200 POWERED AIR PURIFYING RESPIRATORS (PAPR)

- Triple alarm system creates an audible, vibratory, and visual alarm to warn workers of battery life and/or clog
- Vibratory alarm can be felt even through jackets; warns workers who are hearing impaired or in high noise environments
- Two visual alarms: one for low battery and a separate one for a clogged filter; workers will know the alarm reason and maintain the PAPR accordingly
- Lightweight for improved comfort and longer wear
- The same unit can be used for either tight fitting facepieces or loose fitting hoods to accommodate different needs and preferences
- Airflow is automatically adjusted to meet OSHA and CSA CFM requirements
- Complete assemblies include motor blower, battery assembly, back pad and belt (breathing tube, head gear, and cartridges sold separately)

ADFLO™ HIGH-ALTITUDE PAPR SYSTEM WITH SPEEDGLAS™ WELDING HELMETS

- Large, clear protective visor is curved, providing excellent viewing angles up, down, and peripherally
- A slim profile makes the helmet lightweight and easy to utilize in tight welding spaces
- With the right type of filter and/or cartridge, the assembly effectively protects against both particles and gases
- Helmet lets you direct the airflow to either your face, visor, or somewhere in-between for more comfort control
- Model **SGT319** filter features Variable Color Technology that allows welders to select between 3 different colour options (clear, cool, or warm), improving their ability to see the weld puddle, joint and arc
- Includes: Speedglas™ heavy-duty welding helmet with auto-darkening filter, Adflo™ high-altitude PAPR system, Lithium-ion battery, Charger, High-efficiency particulate filter & prefilter, Spark arrestor, Wide leather belt, Self-adjusting breathing tube
- Sensitivity: 5 Level (TIG>1A and MIG/MAG, Stick)

- BW™ Ultra is a five-gas detector from Honeywell that is designed specifically for sampling and monitoring confined spaces, before and after entry.
- Large dot matrix LCD screen for easy viewing
- The new 1-Series sensor for enhanced reliability
- Honeywell TouchConnect™ Technology for quicker instrument management
- Remote monitoring for an additional layer of protection
- Expected life for sensors: up to five years.
- Instrument Warranty: 3 Years
- Sensor Warranty: 3 years (2 years NH3, 1 year PID and Cl2)
- Battery Warranty: 2 years
- No. of Detectable Gases: 5

BW™ MICROCLIP X3 MULTI-GAS DETECTORS

- An all-new oxygen sensor that operates consistently for five years - with no replacement costs for the life of the detector - plus a three-year warranty
- Guaranteed runtime for at least a 12-hour shift - down to -20°C - without compromising LEL detection of hydrogen, acetylene and other combustible gases
- IntelliFlash™ light indicating detector has been bump tested and is monitoring correctly
- Durable, rechargeable lithium polymer battery - tested to last in extreme environments
- Ergonomic and wearable - doesn't weigh you down
- Real-time gas concentrations shown on LCD
- Bright, wide-angle visual alarm bars
- IP68 rating ensures maximum protection against dust and water
- User-friendly, tamper-proof operation with just one button and intuitive LCD icons
- Compatible with MicroDock II docking station for automated bump tests and calibration

GASALERTQUATTRO MULTI-GAS DETECTORS

- Combines a comprehensive range of features with a simple one-button operation
- Detects up to four hazards, including H_2S, CO, O_2, and combustibles
- Rugged design keeps it working in the most extreme weather environments and work conditions
- Interchangeable power options with extended battery run times help to minimize overall fleet costs
- The graphic LCD displays easy to identify icons that indicate operational information, such as bump test and calibration status for simplified onsite auditing
- Features IntelliFlash, a green LED that continuously flashes to provide visual confirmation of detector operation and compliance
- Fully compatible with the MicroDock II automatic test and calibration system
- Suited to a wide range of industrial applications

MICROCLIPXL MULTI-GAS DETECTORS

- Slim and compact multi-gas detector is lightweight and comfortable to wear
- Provides affordable protection from up to four hazards
- Rugged and durable water-resistant design with built-in concussion-proof boot
- Features IntelliFlash, a green LED that continuously flashed to provide visual confirmation of detector operation and compliance
- Simple one-button operation offers ultimate ease of use and significantly reduces time spent training the user
- 16 hours of standard data logging and event logging up to 10 events
- Calibration is required only two times per year with a simple one-button automatic procedure
- Powered by a rechargeable battery with extended run-time, expecially in cold weather
- Fully compatible with the MicroDock II automatic test and calibration system

BW CLIP REAL TIME SINGLE-GAS DETECTORS

- Real-time gas level display with the ability to calibrate the device
- Maintenance-free: no sensor or battery changes necessary
- Offers extended longevity with a field-replaceable battery and sensor
- Compact, lightweight design with one-button operation
- Designed for a range of harsh environments and extreme temperatures
- Hibernation mode with case accessory or IntelliDoX
- Automated self-test of battery, sensor and electronics
- Wide-angle flash, which alerts simultaneously with audible and vibrating alarm
- Automatic logging of the 35 most recent gas events and bump test results
- Compatible with MicroDock II and Fleet Manager II software
- Affordable, with low cost of ownership
- BW recommends performing a bump test prior to each day's use to confirm sensor response and alarm

MICRODOCK II AUTOMATED INSTRUMENT DOCKING STATIONS

- Fully automatic "hands-free" calibration, functional bump testing, record keeping and charging
- Automatically verifies performance of sensors, as well as audible and visual alarms
- Stores and updates calibration records in the MicroDock II, as well as in data logging instruments
- Quick and easy compliance – simple, automatically maintained accurate records
- Light weight and fully portable with optional wall mount
- Operates via 6-V line power or four C-cell batteries (batteries not included)
- Fully customizable
- Add self-contained docking modules to the system via simple, plug-in connections
- Multiple Microdock II systems can be connected via a LAN
- Includes BW Fleet Manager II software for easy data analysis
- Multi-language support in English, French, German, Spanish, and Portuguese
- One base station with one AC outlet supports up to ten modules to suit your application

ALTAIR® MAINTENANCE-FREE SINGLE-GAS DETECTORS

- Factory-calibrated detector with warranted two-year service life (1080 alarm minutes)
- Sensor options for CO, H_2S, and O_2
- Maintenance-free; no sensor or battery change necessary
- Easy bump check and built-in calibration feature
- Event recorder stores last 25 events automatically in instrument memory
- MSA Link™ software-ready
- High capacity battery
- Rated to IP67 for dust and water ingress
- Weight: 4 oz.
- MSA recommends performing a bump test prior to each day's use to confirm sensor response and alarm

CARBON MONOXIDE MONITOR WITH TEMPERATURE & HUMIDITY

- Measures carbon monoxide (CO), air temperature and relative humidity
- Features a large LCD display, built-in clock and calendar, max hold function and user-adjustable alarm limit
- Can be mounted on a wall or placed on desktop
- Manual CO calibration to zero
- Low battery indicator
- Includes: Desktop Carbon Monoxide (CO) monitor with temperature & humidity, Batteries
- CO Range: 0 - 999 ppm
- Temperature Range: 32° - 122°F (0° - 50°C)
- Power Supply: 4 AAA Batteries, AC Adaptor (Optional)

COMBUSTIBLE GAS DETECTORS

- Following is a partial list of the more common gases detected: natural gas; propane; butane; methane; acetone; alcohol; ammonia; steam; carbon monoxide; gasoline; jet fuel; hydrogen sulfide; smoke; industrial solvents; lacquer thinner; naphtha
- Audible and visible alarms
- Low power semi-conductor sensor
- **Includes:** Soft carrying case and batteries

Sensitivity: 50 ppm methane
Warm-up Time: Approx. 5 minutes
Response Time: < 2 seconds
Alarm Limit: At 10% LEL for methane
Power Supply: 3 x "C" batteries
Battery Life: 8 hours of continuous use
Probe Length: 16"

MANHOLE GUARD RAILS

- Simple one-piece construction offers easy, no-tools assembly
- Rail locks open and two hooking chains provide protected entry and exit
- Rail accommodates signs, flags or lights, and it can be used with guard rail tents, umbrellas or a winch
- Designed to protect an area 33" L x 33" W, this 42" high guard rail collapses to only 44" L x 44" W x 4" H for easy storage
- Strong, one-inch tubular 0.078 gauge steel construction is powder coated in safety yellow for a durable finish and for high visibility
- Weight: 34 lbs.

DELUXE WORK TENTS

- Easy to use and very durable
- Feature quick set-up from the inside or outside, with the fibreglass rod frame
- Frames uniquely designed to not pull out or poke through the fabric
- A handy attached roll-up flap provides compact storage and easy transport
- One-door design with zipper closure, or two-door design with one zipper closure and one roll-up door
- Pitch roof style provides extra headroom, structural strength and repels snow and water
- Frame rods are bolted for increased stability and the unbreakable hinges are made of rolled steel
- Free-standing structural stability excellent in windy conditions
- Includes: Blower duct tube in the rear of the tent and a covered window

8" PLASTIC COM-PAX-IAL BLOWERS

- 1/3 HP, 115 V motor
- Lightweight, corrosion, UV and chemical resistant polyethylene housing offers a superior design with durable construction
- Integrated carry handle is molded into the blower
- Compact, super quiet unit
- Features a polypropylene nine blade fan, a steel/powder coated grill
- Bottom enclosure ensures safe and convenient storage of electrical components
- Designed to work separately or with canister and ducting
- Explosion proof models feature statically conductive ducting
- Quick-connect clipping system allows tool-free attachment of canister to input side for powerful extraction or output side for ventilation
- Electric, explosion-proof single-phase motor includes NEMA rated 115 V plug for use with explosion-proof socket (sold separately). Meets Class I, Divisions 1 and 2, Groups C and D and Class II, Divisions 1 and 2, Groups F and G Hazardous

MVP MANHOLE VENTILATION PASS THRUS

- Designed to maintain and re-direct air flow with minimal restriction into manholes, sewers and tanks
- Combines the low profile manhole air vent, 90° elbow and built-in mounting all into one easy assembly
- Air vent and elbows made from recyclable bright yellow linear low density polyethylene (LLDPE)
- Vinyl polyester duct with PVC coating is heat resistant up to 180°F
- Low profile elbow fits underneath the lower cross bar of the guardrail
- Manhole cover fits into flat channeled corners for stabilization
- Small storage bag holds ducting
- Quick release draw string to drop ducting into manhole
- Collapsible duct for easy entry springs back into shape once worker is down into the manhole
- Combines three components, the low profile manhole air vent, 90° elbow and built-in mounting all into one easy assembly

CONFINED SPACE RESCUE SYSTEMS

- DBI Sala has an extensive line of rescue and retrieval systems to suit your confined space entry and rescue needs
- High-quality, rugged systems meet applicable industry standards, and can be customized to suit your needs
- Ease-of-use ensures you have the ability to handle a crisis simply, flawlessly, and immediately
- Made from quality materials strong enough to endure rough handling and exposure to the elements
- Systems are adjustable and adaptable to extreme environments and uneven terrain
- Modular design allows you to add to the system over time
- Portable systems are easy to transport, set-up, and store

SEALED SELF-RETRACTING LIFELINE W/RETRIEVAL WINCH

- This sealed SRL incorporate a revolutionary patented concept that separates all dynamic components from foreign elements such as grease, moisture and dirt, ensuring your SRL is always operating at peak efficiency, no matter how dirty or damp your environment
- Incorporates a self contained bi-directional retrieval winch suitable for raising and lowering personnel in emergency rescue/retrieval situations
- Winch drive incorporates and overload device thus reducing the possibility of injury should the worker become entangled during retrieval
- Input crank handle brake will prevent movement of the load if the operator accidentally released the handle during raising/lowering
- In the event of a fall, the self adjusting disk brake will stop the fall and limit the arresting forces imposed on the worker to 900 lbs. or less
- Incorporates a quick-mount bracket that enables the user to attach it to a DBI/SALA support structure (tripod, davit arm, etc.) with ease
- Swiveling anchorage loop to prevent twisting of lifeline
- Self-locking swivel snap hook with impact indicator
- Reserve lifeline retention system for added safety
- 50 ft. 3/16" galvanized steel wire rope for durability
- Stainless steel and cast aluminum housing for corrosion resistance

THE ABC'S OF FALL PROTECTION

3M | DBI SALA PROTECTA

Fall Protection

A typical Person Fall Arrest System (PFAS) incorporates three components, often described as the ABC's of fall protection. The anchorage connector, body support, and connecting device, when used together, form a complete system for maximum worker protection. But don't forget about the other components of any fall protection program; D: descent, rescue, and retrieval of a fallen worker, E: education, and F: fall protection for tools.

Anchorages are a secure point of attachment. They must be able to hold fast under more than a ton of force generated in a fall.

Body support harnesses distribute fall forces over the upper thighs, pelvis, chest, and shoulders. They provide a connection point on the worker for the PFAS.

Connectors such as shock absorbing lanyards or self retracting lifelines connect a workers harness to the anchorage.

Descent and rescue devices are used to retrieve an injured worker or lower him to the ground.

Education is essential. We offer a variety of training and consultative services to fit your needs.

Fall Protection for Tools helps make work environments safer and more productive by reducing dropped object incidents

FULL BODY HARNESS APPLICATIONS

CSA STANDARD Z259.10 DIVIDES HARNESSES INTO 5 CLASSES:

CLASS A

PERSONAL FALL ARREST

Class A full body harnesses are designed to support the body during and after the arrest of a fall.

CLASS D

SUSPENSION AND CONTROLLED DESCENT

Class D full body harnesses are designed for suspension or controlled descent from a height.

CLASS E

LIMITED ACCESS (EVACUATION)

Class E full body harnesses are designed to support a worker in a position that reduces the worker's profile during passage through a limited access area.

CLASS L (LADDER)

LADDER CLIMBING

Class L full body harnesses are designed for use with fall restrict systems involving the use of a fall arrester that travels on a vertical lifeline or rail.

CLASS P

WORK POSITIONING

Class P full body harnesses are designed to position a worker during a work operation.

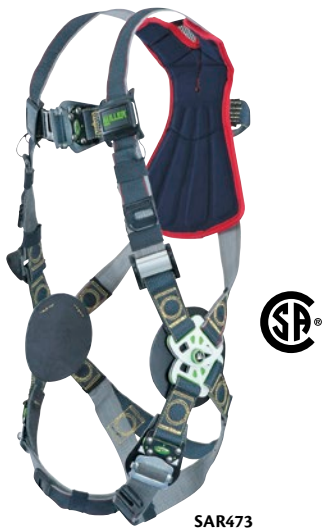
MILLER® REVOLUTION™ ARC-RATED HARNESSES



Designed to protect workers from falls caused by electric arc-flash and arc-blast exposure when working at heights or in confined space applications near energized electrical sources.

- Features the same key elements as the Revolution Harness (see page 311)
- Kevlar®/Nomex® Miller® DualTech™ webbing - patent-pending 10 000 lb. tensile strength webbing is engineered with permanent fire retardant (FR) properties.
- Webbing offers the durability and FR properties of Kevlar® on the outer side, with softer FR Nomex® on the inside of the webbing for greater comfort
- Webbing assures arc protection and durability that eclipses any nylon webbing
- PivotLink™ design allows unmatched freedom of motion and comfort, while the unique cam buckles provide easy two-finger adjustment
- Leather insulators under all metal hardware offer additional protection for the worker
- Kevlar® web loop on the back pad allows for a "metal-less" connection when used with a Kevlar® shock-absorbing lanyard with a choke-off loop
- All Revolution™ arc-rated harnesses have bright red binding on every pad, making them easily identifiable as an arc-rated product
- Weight capacity: 400 lbs. (181.4 kg)
- Meets stringent ASTM F887-05 arc-flash standards
- Certified to CSA standard Z259.10

RITE-ON™ HARNESSES

Designed with two things in mind: Simplicity and Comfort. It's constructed to shape around the user with ease. The harnesses are engineered with a lumbar support to make the donning of a harness a breeze. The comfort pad also eliminates the tangling of the straps which are common with traditional harnesses. The bayonet style connectors allow users to connect their chest and legs straps in a single action.

RITE-ON™ HARNESSES

- Integrated back and shoulder pad – Conforms to the wearers' shape to provide all-day comfort
- Fast-action bayonet style connectors – Allow quick and easy donning
- Extended D-ring option – Makes lanyard connection easier and safer
- Sweat wicking pad fabric – Keeps wearers comfortable in hot conditions
- Tangle-free pad design – Harness keeps its shape between use, aiding quick and easy donning
- Lightweight polyester webbing – Offers superior UV and chemical resistance
- Universal size with full adjustability – One size fits most
- Weight capacity: 400 lbs. (181.4 kg)
- Certified to CSA standard Z259.10

V-FIT™ FULL BODY HARNESS

- Using a patent-pending RaceFlex™ connection, webbing is routed across the chest for a secure and comfortable fit
- The RaceFlex™ Buckle creates an athletic cut, contouring the harness to the body and improving upper torso movement on the job
- Shoulder padding responds to your movement to conform to your body, eliminating pressure points and chafing, and can be removed for cleaning
- Patented leg strap design keeps leg straps in place as webbing lays horizontally across the thighs, creating a more natural fit
- Pull-down adjustment allows you to quickly and easily get the right fit that lasts throughout the work day
- Dedicated attachment point for personal fall limiters allows for quick and easy attachment, and keeps your back D-ring free for other use
- Weight Capacity: 400 lbs.
- Chest Strap Connections: Quick-Connect
- Standards Met: ANSI Z359.11, CSA Z259.10 & OSHA

CABLE LADDER SAFETY SYSTEMS

- The Lad-Saf™ flexible cable system consists of a top and bottom bracket that act as anchors for a steel cable that runs the length of the climbing area
- A Lad-Saf™ sleeve connects the worker to the system, automatically follows the user during the climb, and locks on to the cable in the event of a fall
- Designed for ease of use, economy, and versatility
- Integrated tension indicating bottom brackets take the guess work out of installation
- Galvanized and stainless steel construction stands up to harsh environements for added longevity
- Integrated shock absorbing top bracket reduces forces imposed on ladder during a fall
- Intermediate cable guides prevent cable wear against the ladder and permit the climber to bypass without disconnecting
- Complete system includes both top and bottom brackets, cable and cable guides. They do not include a sleeve, carabiner, or harness
- System is also customizable, call today to learn more

TYCHEM® 4000 COVERALLS

- Tychem® 4000 is laminated to Tyvek® fabric
- Offers dependable protection against a broad spectrum of chemicals
- Provides great protection against hazardous particles and liquids
- Rugged and durable strong fabric, reducing the risk of tears and abrasion
- Bound seams
- Colour: White

SA194

Applications:
Petrochemical manufacturing, waste management, industrial plants, hazardous material response, emergency medical response, paint spraying, radioactive environments, environmental cleanups and other emergency services. Commonly used in domestic preparedness for protection from biohazards, several toxic industrial chemicals and some chemical warfare agents.

TYCHEM® 6000 COVERALLS

- A proprietary barrier laminated to a Tyvek® substrate
- Strong and lightweight, with broad chemical barrier
- Used for protection from chemical warfare agents
- Widely used by military first responders for weapons of mass destruction situations
- Taped seams, attached hood (respirator fit), front zipper closure, storm flap, elastic wrists and attached socks
- Colour: Grey
- Available in sizes small to 4X-Large

SAS200

Applications: Because Tychem® 6000 garments are only available with respiratory fit hood, storm flap and taped seams, these garments are intended for domestic preparedness situations where the potential for exposure to chemical warfare agents exists. When the hazard assessment consists of potential for exposure to the FBI's Toxic Industrial Chemicals most likely to be used in a terrorist threat, we suggest consideration of Tychem® CPF 3 or higher protection since permeation data is available on a much broader spectrum of chemicals including chemical warfare agents.

HIGH-VISIBILITY STANDARD: CSA Z96

Hi-Vis apparel is a function of two parts – retro-reflective striping (most common is silver tape), and luminance of background material (generally fluorescent yellow-green or fluorescent orange-red).

CLASSES

Class 1

Apparel is a basic harness or stripes/bands over the shoulder and encircling the waist (stripes/bands only meet CSA standard). Can be Level 1, 2 and FR retro-reflection.

Class 2

Apparel is full coverage of upper torso – front, back, sides and over the shoulder (stripes/bands and background fabric both meet CSA standard). Can be Level 1, 2 and FR retro-reflection.

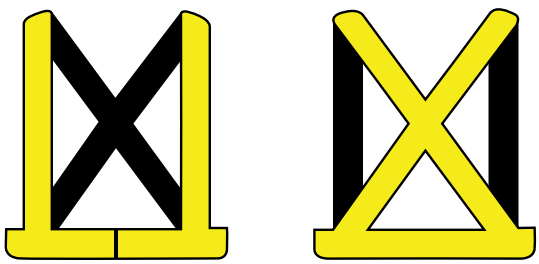
Class 3

Apparel is Class 2 apparel in addition to bands encircling both arms and legs (all stripes/bands and background fabric meet CSA standard). Must have Level 2 retro-reflection.

LEVELS

Level FR

This level allows for flame resistant garments with striping/bands where the total retro-reflective level is at 20% of the level 2 requirement (FR treated fabrics lose luster after treatment).

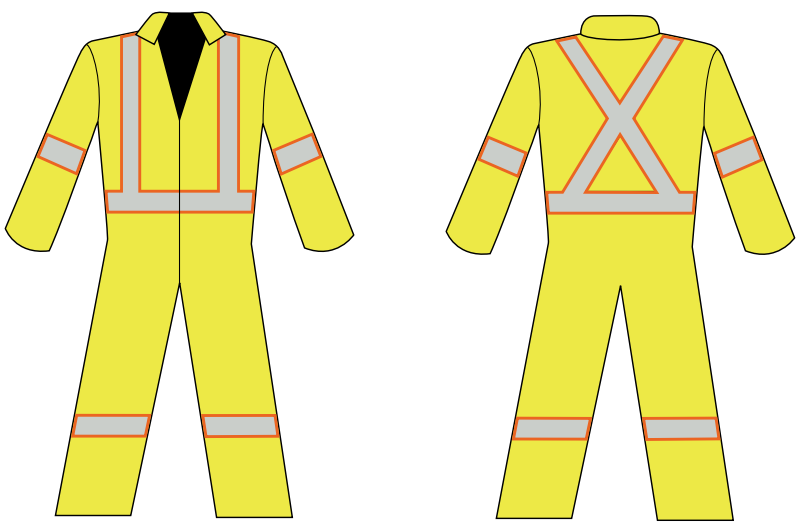


Level 1

Level 1 is a slightly lower performance level of the striping, but still requires the background material to meet CSA standards. Retro-reflective level is at 70% of the Level 2 requirement.

Level 2

Level 2 is highest level of retro-reflection and requires the background fabric to meet CSA Standards as well as the striping/bands to meet the highest coefficient level (the brightest level).



CLASS 1

CLASS 2

CLASS 3

ARC FLASH LIFT-FRONT HOOD

- Shield and chin guard offer an additional 45 degrees of vertical view over standard hoods
- Vertical peripheral vision field increases by 109% which allows for a clearer view of surroundings
- Contoured lens naturally extends range of peripheral vision giving user a greater outward visibility and more access to natural light
- Allows for use of task lights to add much needed convenience lighting in dark work places
- Contains 60% less fabric weight than standard hoods which makes it lighter and more comfortable to wear
- Reduction in fabric allows for more natural head movement and eliminates the need for frequent hood adjustments due to shifts in the excess fabric
- Industrial design creates a natural ventilation system beneath the brim of the hard hat
- Ventilated bracket design allows carbon dioxide and heat to escape as it rises from the body
- Colour: Grey
- Arc Rating: 40
- Standard(s) Met: NFPA 70E
- Arc Flash PPE Category Level: 4

PORTABLE GLOVE INFLATORS

Electrical insulating gloves must be inspected before each use. Inspection is simplified by using a portable glove inflator such as the Salisbury G100 with adapter for Class 00 and 0, and smaller size gloves, patent pending.

- Simple, easy to use
- Provides a quality means of inspecting gloves in the field
- Glove is secured to the inflator using a nylon strap and fastened with hook and pile, or a rubber O-ring
- Inflation is accomplished by pumping the bellows of the inflator

STAINLESS STEEL MESH GLOVES

- This double interlocked metal mesh ambidextrous glove is formed using state-of-the-art micro plasma welding techniques. The result is stronger, smoother, hermetically sealed ring connections that have no gaps or weak spots
- The self-adjusting tensioning system allows for easy fit with no straps or buckles to fasten. There is no fabric cuff to wear out or become contaminated. The glove is easy to clean.
- Meets ANSI/ISEA 105 Level 5 for cut resistance

Micro plasma weld

Resistance weld

Micro plasma welds create value. Links are stronger so the gloves wear longer. There is also a lower risk of contamination because, unlike resistance-welded mesh rings, micro plasma welded rings leave no gaps to trap soil.

SHOWA
Always Innovating. Never Imitating.

POLYMERS

Naturally occurring and man-made polymers are essential building blocks of hand protection. Specific polymers protect workers from specific hazards. There is no ideal glove that works in every situation. Best® utilizes a variety of polymer coatings and fabrics, designed for a variety of tasks.

NEOPRENE (POLYCHLOROPRENE, CR)

Strong, durable neoprene gloves provide excellent protection from physical hazards such as cuts and abrasions and also provide excellent chemical resistance for protection from exposure to organic and inorganic acids. Neoprene gloves also provide excellent protection from many organic solvents, oils, greases and petrochemicals and resist degradation from ozone, sunlight and oxidation. In addition, neoprene remains functional and flexible at temperatures ranging from -10° to 300°F (-23° to 150°C).

Neoprene

NATURAL RUBBER

Natural rubber, the most elastic substance known, is found in over two hundred plants including the rubber tree (Hevea Brasiliensis), the source of natural rubber latex used to manufacture gloves.

Natural rubber is a flexible and soft, yet tough and durable coating that provides excellent protection from physical hazards and provides an outstanding grip. Natural rubber provides excellent protection from exposure to aqueous chemicals such as acids and caustics, and limited protection from alcohols and ketones. Natural rubber gloves do not hold up well in organic solvents, oils, greases or fuels such as kerosene or gasoline.

CAUTION: Natural rubber latex has been shown to cause allergic reactions in sensitised individuals.

Natural Rubber

NITRILE (ACRYLONITRILE-BUTADIENE RUBBER)

Nitrile, a versatile synthetic copolymer, is used to make a variety of gloves ranging from heavy-duty work gloves to ultra-thin medical and clean room gloves. Nitrile coating provides tough protection from physical hazards such as cut, puncture or abrasion. Nitrile-dipped gloves also provide chemical resistance to petrochemicals (especially fuels), oils, greases, pesticides and other agricultural chemicals while providing excellent dexterity.

Nitrile

PVC (POLYVINYL CHLORIDE)

PVC is an economical synthetic thermoplastic polymer that is exceptionally durable. PVC gloves provide excellent protection from limited chemical exposure and physical hazard protection. They are noted for being durable and function well in temperatures ranging from -30° up to 212°F (-34° up to 100°C).

PVC

VITON® (FLUOROELASTOMER)

Viton® provides excellent chemical resistance to fuels used in the aerospace industry. It provides excellent protection from exposure to aromatic hydrocarbons such as benzene, toluene or xylene. Viton® gloves are available in unsupported version only. For working with extremely hazardous chemicals such as carcinogenic or highly toxic chemicals, Viton® works where no other glove works.

Viton®

BUTYL® (BUTYL RUBBER)

Butyl® rubber's tight molecular structure provides excellent chemical resistance to gases and ketones. Butyl® gloves are manufactured in unsupported version only and are used by the military for protection from chemical warfare agents. Butyl® rubber is severely affected by exposure to fuels and aliphatic and aromatic hydrocarbon solvents.

Butyl®

TYPES OF GLOVES

DISPOSABLE GLOVES

This category of unsupported gloves is generally characterised as a thin-gauge glove that is not intended for repeated use. They may have a donning agent such as powder or a polyurethane slip coating, or powder-free.

LAMINATED GLOVES

This special nitrile-coated fabric is made by transfer-coating the nitrile polymer onto a textured surface and then laminating the nitrile film onto Sanitized® poly-cotton fabric for superior comfort and flexibility.

IMPREGNATED GLOVES

This special nitrile or PVC-coated fabric is made by knife-coating nitrile or PVC directly onto Sanitized® cotton fabric.

SUPPORTED GLOVES

These gloves offer a polymer coating over a cotton, nylon or aramid liner. The textile substrate imparts adds strength and resistance to abrasion, cuts and punctures.

UNSUPPORTED GLOVES

These are polymer gloves with no textile lining. These gloves include heavyweight, medium weight or disposable gloves. They may be chlorinated or have a cotton flock lining for easier donning.

CUT RESISTANT GLOVES

This special category is characterized by the utility of the gloves and includes either polymer-coated gloves or special high performance yarns that are designed to impart cut-resistance or combinations of these.

CSA Z195 PROTECTIVE FOOTWEAR

This National Standard of Canada deals with protective footwear and includes requirements for resistance against toe impact, sole puncture, electric shock, chainsaws, as well as requirements for static discharge and electrical conductivity. Footwear that has been certified by CSA group to the CSA Z195-14 standard is eligible to bear our Protective Footwear Certification Markings.

CSA CERTIFICATION MARK FOR CANADA — Indicates footwear is CSA-certified to Canadian national requirements

LABEL	DESCRIPTION	LOCATION
PROTECTIVE FOOTWEAR CHAUSSURES DE PROTECTION ######	This serialized label indicates certification by CSA group and is only available through CSA.	This label will be side-stitched or heat-sealed inside the top of the tongue or inside the quarter lining of the right shoe.

CLASSES OF PROTECTION

One or more of these markings will appear on the outer side or the tongue of the right shoe

PROTECTION MARKINGS	SAFETY FEATURES
	Indicates sole puncture protection with a Grade 1 protective toe to withstand impacts up to 125 Joules.
	Indicates sole puncture protection with a Grade 2 protective toe to withstand impacts up to 90 Joules.
	Indicates the footwear features a Grade 1 protective toe without sole puncture protection. A Grade 1 protective toe withstands impacts up to 125 Joules.
	Indicates the footwear features a Grade 2 protective toe that withstands impacts up to 90 Joules.
	Indicates chainsaw protective footwear. Prevents a running chainsaw from cutting all the way through the boot uppers, protecting the shins, ankles, feet and toes.
	Indicates soles that provide resistance to electric shock. The certified footwear has electrical insulating properties intended to withstand 18 000 Volts and a leakage current not exceeding 1 mA.
SD	Indicates soles that are static-dissipative. The test criteria are 10^6 to 10^8 Ohms. Note that SD footwear without toe protection will not have sole protection certified by CSA Group.
SD+	Indicates soles that are super static-dissipative. This protection feature is similar to SD, except the test criteria are 10^6 to 3.5 x 10^7 Ohms.
C	Indicates soles that are electrically conductive. Test criteria are 0 to 500 000 Ohms.
M	Indicates metatarsal protection for the complete dorsum (top side) of the foot. A metatarsal protector withstands impacts up to 101.7 Joules.

DUNLOP PROTECTIVE FOOTWEAR

12" LATEX HAZMAT

Made of 0.60 mm, high visibility yellow latex rubber, the Hazmat boot cover offers protection from a broad range of materials. Seamless covers provide a snug fit over existing footwear for an added layer of protection. The ribbed and textured sole provides traction on a variety of slippery surfaces. Strong enough to be worn many times, yet economical enough to be disposed of after a single use. 100% waterproof.

15" PVC BOOT/SHOE COVER

Made of a strong 0.20 mm PVC upper, heat-welded to a hard, embossed 0.50 mm PVC sole for superior slip resistance. Completely waterproof, equipped with an elastic top for easy pullover comfort and a secure snug fit. 100% waterproof.

CLASSES OF FIRE:

Fires are classified according to the material that is burning. Fire extinguishers are rated by the area each will cover for a particular class of fire. The higher the number, the bigger the fire area you can fight.

Note: Maintenance and recharging of all fire extinguishers should be performed by a qualified service company.

CLASS A fires are the most common. They involve ordinary combustibles such as wood, paper, cloth, rubber, a number of plastics, and other ordinary materials.

CLASS B fires are caused by gasoline, grease, oil, paint and other flammable liquids. Commonly strikes in warehouses and manufacturing plants.

CLASS C for live electrical equipment. Often occurs in computers, monitors, wiring and appliances.

EXTENSION POLES & ACCESSORIES

- Used with smoke detector tester, light weight aluminum poles allow user to test detectors up to 30' in height without the use of ladders
- The head extension pole holds the aerosol can, while the arm extension pole allows you to reach greater distances
- Multiple arm extension poles must be used in conjunction with the head extension pole to reach the maximum height of 30'
- The fibreglass adapter tube reduces the tendency to overspray and maintains the aerosol an appropriate distance from the detector, making it easier to conduct tests

CONVENIENCE & PROTECTION FACTORS

DOOR STYLE PREFERENCE

Whereas door style is usually chosen by preference, the Uniform Fire Code (UFC) mandates the use of self-closing cabinets. Cabinets with self-closing and self-latching doors provide an extra measure of protection.

Manual

Economical manual-close doors permit doors to open a full 180°. When pushed closed they will automatically self-latch.

Sliding

A single bi-fold, sliding door glides smoothly on a spring loaded track for easy, one handed access to cabinet contents. It self-latches and self-closes, and is equipped with a fusible link to hold the door open during use and melts at 165°F (74°C) to automatically close door under fire conditions.

Self-Close

This style self-indexes, self-latches and self-closes to automatically shut doors upon release. Mechanism is concealed in the top wall, maximizing available shelf space. Fusible links hold doors open during use. In the event of a fire, fusible links will melt at 165°F (74°C) to automatically close doors.

All cabinet doors feature a continuous piano hinge for smooth operation, a three-point closure with keyed lock and a self-latching mechanism on all door styles.

DOOR HANDLE

Attractive, self-latching paddle style handle offers easy fingertip access to contents. Flush mounted design keeps aisles clear and reduces dangerous "catches" from passing traffic. Padlock tag offers added security and serves as a visual deterrent. Provides the flexibility of the lock being master keyed, keyed alike or keyed different for convenience.

WARNING LABELS

Strategically positioned labels warn others of cabinets contents and help firefighter to easily locate volatile liquids

TYPE OF CHEMICAL TO BE STORED

Using colour and labeling in your storage practices helps identify, organize and segregate liquids. It also helps fire department personnel recognize hazards when responding to fire situations.

FM APPROVED

FULLY COMPLIANT MEETS OSHA NFPA FULLY TESTED

PERFORMANCE TESTING

Cabinets are independently tested by FM Approvals Research and/or Underwriters Laboratories and built to OSHA/NFPA standards.

A SELF-LATCHING CABINET MAKES A DIFFERENCE!

A self-latching door and handle is critical as it does not require the user to manually rotate a handle to ensure the three-point latch is properly engaged. This is an important detail since an unlatched cabinet leaves the flammable contents exposed to a potential fire, where every single second of protection counts. A safety cabinet must be latched for it to perform according to code, providing maximum safety under fire conditions. A stainless steel bullet latching system offers optimum longevity with increased heat resistance.

THE REDBOOK

YOUR GUIDE TO HANDLING FLAMMABLE & COMBUSTIBLE LIQUIDS SAFELY

Backed by a century of experience, Justrite Manufacturing Company has been providing workplaces with compliant, protective solutions for managing hazardous materials.

Their expertise and equipment offer ways to safely **Store**, **Transfer**, **Use**, and **Dispose** of flammable liquids.

The **S.T.U.D.- Evaluation** system has been recognized as a vital part of environmental health and safety programs worldwide.

Except in rare cases of natural catastrophes, every fire is preventable. That's why there's Red Book.

What are the benefits of a S.T.U.D.-E?

Conducting a **STUD-E** for a facility results in an overall improved safety program.

Companies enjoy:

- Improved protection for both employees and the company
- Improved handling efficiencies and cost savings opportunities

FLAMMABLE STORAGE CABINETS

- Double-wall 18-gauge welded steel construction with 1 1/2" air space
- Dual 2" capped vents with flame arrestors

SURE-GRIP® EX SPECIALTY CABINETS

STORE SMALLER QUANTITIES NEARBY!

When storing smaller quantities of flammable liquids at a work station or adding to existing storage capacities, specialty cabinets make it possible to store flammables safely even when available space is at a minimum. These cabinets offer U-Loc™ handles and come with a double key set or accept an optional padlock for greater security. Chemical resistant powder coat paint resists corrosion for years of service. They also have Haz-Alert™ reflective warning labels to offer visibility under dark conditions. Meet NFPA and OSHA regulations.

MINI SAFETY CABINETS

- Offers the smallest footprint
- Hold small quantities of flammables for cleaning and maintenance at point-of-use
- Three bungee cords keep contents in place during transportation on service vehicles or carts

COUNTERTOP & COMPAC SAFETY CABINETS

- Improved access to often used liquids, without compromising safety
- Portable size keeps work areas flexible

SLIMLINE SAFETY CABINETS

- Small footprint allows placement almost anywhere

STACKABLE PIGGYBACK CABINETS

- Can be used singly or stacked to provide expanded or segregated storage
- Suitable for wall mounting or countertop
- Wall brackets not included

WALL MOUNT SAFETY CABINETS

- Store small containers without taking up extra floor space
- Mounts easily with furnished brackets

UNDERCOUNTER SAFETY CABINETS

- Designed to fit under most counters
- Designed with a kick plate to match existing casework

TYPE I POLYETHYLENE SAFETY CANS

Choose type I nonmetallic safety cans when dent and chemical resistance are important. Type I safety cans constructed of high-density polyethylene offer distinct advantages over steel units.
- Dent, chip and puncture-resistant polyethylene stands up to harsh corrosives
- Current carrying carbon insert grounds the opening and flame arrester
- Self-close spout and pressure relief mechanism
- Flame arrester prevents ignition sources from entering the can
- Stainless steel hardware provides chemical protection
- FM approved

A GUIDE TO EMERGENCY EYEWASH & SHOWER EQUIPMENT

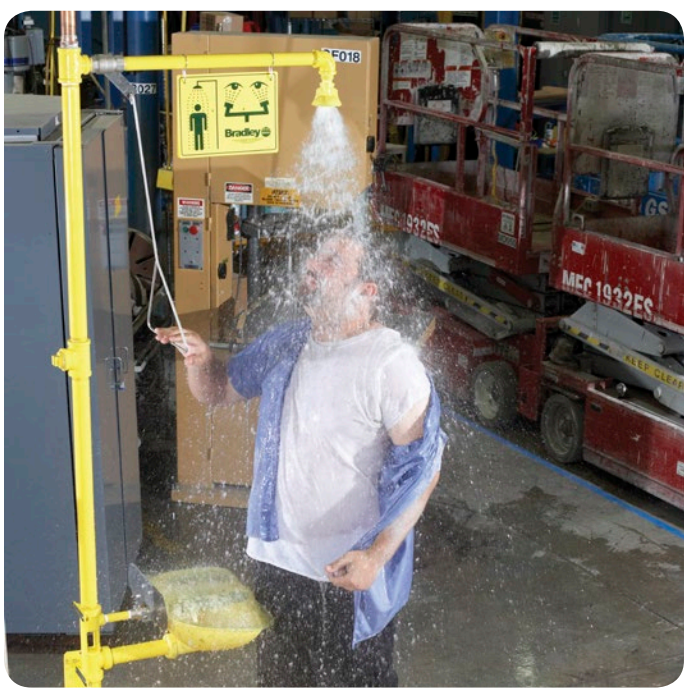
Emergency showers, eyewashes and tepid water delivery systems are required to provide emergency treatment in preventing permanent eye and skin damage from accidental exposure to chemicals, biohazards or airborne debris.

In the absence of a uniquely Canadian standard for the design and placement of emergency eyewash and shower equipment, provincial authorities in all jurisdictions in Canada refer to the ANSI Z358.1 standard for recommendations and enforcement regarding emergency eyewash and shower requirements. We offer a comprehensive range of products and services to help comply with ANSI emergency shower and eyewash guidelines including site audits of existing or future installations to ensure compliance.

Emergency drenching fixtures must be readily accessible for use in manufacturing, laboratories, refineries, mines, construction sites and wherever workers may be accidentally splashed or sprayed with injurious solvents, acids, harmful particulates and, in some cases, biological hazards.

KEY REQUIREMENTS FROM THE ANSI STANDARD Z358.1 INCLUDE:

- Device must be positioned within 10 seconds (55') from hazard
- Device must activate in one second or less
- Device must be capable of delivering minimum flow of flushing fluid for at least 15 minutes*
- Device must provide "tepid" water (16-38°C, 60-100°F)
- Device must be activated weekly to remove dust/debris
- There must be no obstruction in the pathway to the device
- The water supply uninterruptible at the valve
- Device must be identified with highly visible signage
- Device must be well lighted
- Device must be fully inspected annually (Contact us for support)



*** Because of the limited quantity of fluid they contain, supplemental eyewash devices alone (such as bottled eyewash) cannot meet the 15 minute flushing requirements in the ANSI standard. These should be used for initial first aid only to treat a patient during the path to certified eyewash. You should never substitute a fully compliant eyewash station with supplemental devices.**

Safety flushing devices are not a substitute for primary personal protective devices such as proper eyewear and clothing. Chemical MSDS' dictate proper first aid measures in case of accidental exposures.

Depending on site conditions and severity of the hazard, emergency eyewash and shower devices are found in various forms including:

- Plumbed-In
- Enclosed Safety Showers
- Portable
- Laboratory
- Tempering Systems
- Supplemental Devices

EMERGENCY EYEWASH & SHOWER EQUIPMENT

PLUMBED-IN EYEWASHES & SHOWERS are designed to direct a fixed water source to eyes, face or body in emergencies. Wall mount or pedestal-mounted eyewashes and eye/face washes should be located nearest the point of need but no more then 10 seconds (55') from the hazard.

HALO™ WALL MOUNT EYEWASH STATIONS

- Features antimicrobial protection, integral strainers, and rugged safety-yellow powder coating for easy visual identification in an emergency
- Aquaduct™ self-draining design eliminates bacteria growth from standing fluid
- Eye/face wash models provide industry leading 85% facial coverage
- Activate by push handle or by lifting dust cover
- Optional see-through dust cover (shown) makes inspection simple and keeps device free of debris and ready for use
- Stainless steel models are ideal for corrosive, high abuse environments
- Wheelchair accessible
- Arrives fully assembled
- ULC certified to ANSI standard Z358.1

IMPORTANT:
Regulations require tepid water (18-37°C). See page 543 for water tempering devices

WATER TEMPERING PRODUCTS are designed to meet ANSI standard Z358.1 requirements to deliver "tepid" water to injured workers. In addition to discouraging use of a safety flushing device, a 15-minute deluge of cold water to the injured worker can negatively affect core body temperature, and hypothermia can result. Therefore, ANSI standard Z358.1 requires emergency showers and eyewashes to deliver "tepid" water. ANSI defines "tepid" water as 15.6°C to 38°C (60-100°F). Tempering solutions include steam, instantaneous (on demand) heaters and thermostatic mixing valves (TMV's). TMV's blend hot and cold water to meet strictly specified water temperature ranges.

THERMOSTATIC MIXING VALVES

- Blend hot and cold water to a comfortable flushing temperature
- Reliable liquid-filled thermostat with a 10-year manufacturer's warranty
- Check stops on inlets
- Adjustable set point within temperature range
- Accurate temperature control to within ±3°F
- Built-in cold water bypass, assuring cold flow
- Easy installation and serviceability
- Positive shut-off of hot supply when cold supply is lost
- Dirt and lime resistant
- Dial thermometer
- Factory assembled and tested
- Universal mounting capability
- Rough bronze finish
- SEI certified to ANSI standard Z358.1
- Temperature adjustment are vandal resistant

ZENITH® Safety Products

EMERGENCY EYEWASH & SHOWER EQUIPMENT

PORTABLE EYEWASHES provide self-contained fluid where plumbed water is not available. Gravity-fed or pressurized portable eyewash systems should deliver the ANSI minimum 15-minute safety eyewash drench. To keep water stored in these portable systems safe for ophthalmic use, an antibacterial agent is included or available separately. These units often can be freeze protected for outdoor applications. Portable eyewash stations installed in temperatures below 16°C will need to be of a tempering design to maintain compliance with ANSI standard Z358.1

ON-SITE® GRAVITY-FED EYEWASH STATIONS

- Ideal for locations where a plumbed water source is not available
- High-visibility yellow, moulded pedestal and tank
- Transparent tank allows solution level to be checked easily
- Hinged eyewash tray activates in one quick motion
- Stainless steel clamps secure the tank during transport
- Vandal-resistant unit: foreign objects cannot be introduced into tank because all openings are sealed once the tank is installed
- One of the lightest portable eyewashes on the market
- SEI certified to ANSI standard Z358.1
- Includes wall bracket (can also deck mount)

EMERGENCY EYEWASH & SHOWER EQUIPMENT

SUPPLEMENTAL EYEWASHES include bottled eyewash and other devices that do not meet 15-minute drench criteria. These supplemental solutions are designed to treat nuisance hazards and/or as an initial first aid to injured workers during the path to certified eyewash, but they do not meet the 15 minute drench criteria of the ANSI standard Z358.1. Bottled eyewash is designed to be positioned close to the point of need. Acceptable for immediate first-aid, bottled eyewashes should support, but not substitute, a primary eyewash or shower unit.

SALINE EYEWASH BOTTLES

- Contains a buffered saline solution that is sterile and superior to tap water for emergency eye care
- Blow-Fill-Seal (BFS) bottle is tamper resistant, and maintains the sterility and integrity of the eyewash
- Easy to remove and open in emergency situations
- 1, 4, and 8 oz. bottles have user controlled delivery, delivering drops or an irrigating stream of solution, depending on the squeeze pressure applied to the bottle
- Trilingual instructions (English, French and Spanish)
- Does not meet ANSI standard Z358.1 15-minute flushing requirement

KEYED DIFFERENT vs. KEYED ALIKE

Each keyed different lock has a unique key for higher security. Keyed alike locks have the same key for each lock. Keyed alike locks add an extra convenience where many locks are involved. Extra locks can be ordered later to fit the same key number.

8 1/2" x 3 7/8"
Other sizes upon request

PF-CARDSTOCK TAGS

Tear-resistant and waterproof tags last longer than standard cardstock tags.

Tags are pulp-free – no wood pulp or paper content – unlike regular cardstock. They are pliable, yet will not rip or breakdown in moisture.

Tags do not tear readily when tugged on. Ideal for indoor use and short term outdoor exposure. The scuff-resistant, matte surface is easy to write on.

- 10-mil polyolefin-based material
- Thin and flexible
- Top has 3/8" plain hole

RP-PLASTIC TAGS & HS-LAMINATE TAGS

Durable tag withstands pulls and tears in dirt and grease environments.

Plastic tags are water-resistant – to withstand weather conditions.

The rigid plastic is flexible, yet will not readily break down over a wide temperature range. Good for indoors and outdoors use. Writable surface is abrasion resistant.

- 15-mil rigid plastic material
- Flexible, yet durable – withstands stretching and ripping
- Top has 3/8" hole reinforced with metal grommet to prevent pull off

HS-LAMINATE TAGS

Tags are designed to withstand tough and abusive conditions.

HS-Laminate is a composite of all poly materials hard sealed on both sides with no edge seams. Matte surface is scratch resistant, yet easy to write on. Waterproof tags are ideal for extreme weather conditions.

- Tear-proof, weather-proof, chemical-resistant material withstands dirt and grease environments
- Thick laminate stands up to abuse and rough handling
- 3/8" top hole is reinforced with a pull-proof, metal grommet
